

Active duty members and their families enrolled in TRICARE Remote are now covered by a global health care service contract provided by International SOS, a worldwide leader in remote health care services.

International SOS provides routine, urgent and emergency medical to active duty service members and their families. In addition, International SOS provides dental services for active duty members. The TRICARE Dental Program covers the dental needs of family members. International SOS also provides urgent & emergency care for active duty service members (including activated Reserve Component members) who are TDY/TAD, deployed or on authorized leave in remote overseas locations.

Accessing care in a remote area using International SOS is easy. First, select a primary care provider from the International SOS network of providers. If you need help finding a provider (or if you need referral to a specialist), call or email International SOS. Next, visit your provider. When you arrive, present your TRICARE Europe Remote identification card (available from your TRICARE POC). Your provider will then treat you, and submit your claim for payment. That's all there is to it!

International SOS is available 24/7 (If you cannot call collect, you may ask SOS to call you back or email them). More information about the TRICARE Europe Remote health care program (including an online database of providers where you live) is available online at www.europe.tricare.osd.mil/benefit/remote.
